JOHN MITCHELL STRONGLY OBJECTS TO CUT IN WAGES

Proposed Means of Providing Work for Unemployed Declared Unjust and Impracticable.

A decided stand against the acceptance of any reduction in wages by union workmen in order to make work for the unemployed was taken today by John Mitchel, of the United Mine Workers of America, and member of the Workmen's Compensation Commission of New York. The proposal for the reduction of waxes. It is understood, was made by a number

of employers in various cities.
"The workmen must not consent to any such plan," said Mr. Mitchell. "In those industries where the workers, by virtue of their organization, solidarity and hard work for many years have succeeded in raising the scale of wages to a standard above that predominating in average industries, the workers must not risk the sacrifice involved in the proposed plan. Once the workmen consent to a reduction

the workmen consent to a reduction in wages it will mean years of struggle before they will be able to raise it once more to the present rate.

"As far as the less paid industries are concerned it is ridiculous to propose a reduction in wages, because they are the reduction in wages, because they are about as low as they possibly can be, in view of the increased cost of living, and in view of the fact that no working man in the United States can be any too sure of his job. We shall have to seek a solution for the unemployment broblem elsewhere. The work of the American Association for Labor Legislation and the American Association on Unemployment American Association on Unemployment will help us a great deal in this con-nection."

Mr. Mitchell attended the convention of

Mr. Mitchell attended the convention of these two bodies in this city on Monday and yesterday.

Ecually opposed to the plan of reducing wages as a means of ameliorating the unemployment problem was Leonard Kraft, of the Building Trades Council of this city. Mr. Kraft is secretary of the council, and is considered an authority on conditions in the building trades.

"I wonder what the employers will propose next," said Mr. Kraft, "How can we afford to penalize the workers for a condition for which they are not responsible and for which society as a whole must bear responsibility? There may be some unions, who call themselves unions, but who are really financed and controlled by employers, who may accede trolled by employers, who may accede to this plan. But organized labor will never accept it. There are 19,000,000 wage earners in the United States whose average annual wage does not exceed \$500. They are the great majority of the wage earners of the United States, and upon them are dependent a population com-prising some 60,000,000 inhabitants of the total population of this country. Are you going to reduce their wages still further? I don't believe you can do it without entailing still further misery and discontent."
